

Nourish Now's operations are continuing as normal. We are closely monitoring the situation and taking the necessary precautions. We are asking our clients to help us practice safe social distancing when they come to receive food, by limiting the amount of time they spend at our warehouse and waiting in their cars for food to be served. We are still taking volunteers as per our usual volunteer program hours and protocols. We are asking staff and volunteers to follow CDC guidelines on handwashing, sanitizing and staying home if they are feeling unwell. We are committed to continuing recovering food and serving food insecure individuals and families in the county. Please refer to these resources and information about the virus and what you can do to help protect yourself and your family.

### **As of Saturday, March 14th:**

#### **Current Situation:**

- Maryland's total number of cases is currently 26 (as of 3/14/2020). There are currently six cases in Montgomery County (as of 3/13/20).
- Governor Larry Hogan (3/12/2020) announced the first case of community transmission of COVID-19 in Maryland.
- All Montgomery County Public Schools will be closed on March 16-27. Effective immediately, Montgomery County will be following the state's guidelines of a limit of no more than 250 people for public gatherings.
- MCPS is now providing grab-and-go meals for children up to 18 years of age Monday-Friday 11 am - 1 pm at multiple locations in the county during the school closure. Please refer to this [list](#) for locations and details. The pickup locations are listed below with a map.

4610 W Frankfort Dr.  
Rockville, MD 20853

**Earle B. Wood**

14615 Bauer Dr.  
Rockville, MD 20853

## **Coronavirus Information:**

- The immediate risk of being exposed to this virus is still low for most Americans, but as the outbreak expands, that risk will increase. Cases of COVID-19 and instances of community spread are being reported in a growing number of states.
- Older adults and people of any age with underlying health conditions, such as diabetes, lung disease, or heart disease, are at greater risk of severe illness from COVID-19.

You can help stop COVID-19 by knowing the signs and symptoms: fever, cough, and shortness of breath. Seek medical advice if you develop symptoms, have been in close contact with a person known to have COVID-19 or live in or have recently traveled from an area with the ongoing spread of COVID-19.

## **What you can do:**

- Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing; going to the bathroom; and before eating or preparing food.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Put distance between yourself and other people if COVID-19 is spreading in your community. This is especially important for people who are at higher risk of getting very sick.
- Clean AND disinfect frequently touched surfaces daily. This includes tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks
